Introduction

X-861 3DTouch PRO is an ultra HD wheel alignment machine. The height of the camera beam is automatically adjusted according to the height of the targets, movable cabinet and beams are built for increased productivity. It is an intelligent 3D wheel aligner that can collect ultra-high speed and high-precision tire data of the vehicle.

Features

- Remote controlled by wireless touchpad keyboard
- 5 Gbps transmission bandwidth, USB 3.0 interface
- 5 MP camera provides better and wider view
- HD camera lens with temperature compensation function, makes it possible for all times and all conditions to work
- Built for improving productivity by movable cabinet and beam
- Automatically adjust the height of camera beam in keeping with the target height
- Simple alignment procedure with computer voice reminder
- Start to use in seconds, no more tedious work of precalibration
- Body & chassis and tire diameter measurement
